# 4 Ways CatchOn Boosts Remote Learning Efficacy

**Executing a remote and blended learning strategy is a challenge.**

Here are four ways CatchOn empowers districts to most effectively manage remote and blended learning in the 21st century classroom.

**1** Provides visibility into how students are using district-owned devices and online tools both inside and outside the classroom, enabling educators to track student engagement and help ensure all students are being served.

**2** Allows district leaders and teaching staff to see when their students are engaging with their coursework, enabling educators to adjust schedules and gain better insight into overall student attendance.

**3** Enables administrative leaders to track apps and online tools being used on school devices outside of the classroom to ensure students and teachers are using district purchased applications and ones that comply with student data privacy rules.

**4** Enables districts to monitor the health and scalability of eLearning and assess their remote learning efforts using actionable, easy-to-access data to make informed and confident decisions.

**Did you know CatchOn is eligible for CARES Act and other federal funds?

**ABOUT CATCHON**

CatchOn is a user-friendly data analytics tool that compiles real-time data on every device, enabling school districts to make data-informed decisions about the apps and online tools their educators and students are using. In 2018, CatchOn joined forces with ENA, a leading provider of comprehensive technology solutions to education institutions and libraries across the nation. Collectively, CatchOn and ENA leverage their respective resources and expertise to deliver critical services and solutions that help school districts produce positive outcomes in the communities they serve.
